## Master Spray Anti-Dry

Our Anti-Dry is an anti-skin to be used with all offset inks. The Anti-Dry will keep ink open in the ink fountain and on the inking rollers, when any stops occur during the production, such as during lunch breaks, and longer press stops for color adjustments. Anti-Dry can also be applied to the ink in open ink cans, to prevent skin from forming in the ink cans during storage of the ink.

### Advantages:

- Low to no odour when applied to the ink rollers
- Will keep ink open for 24 hours
- Will not affect the ink or the color of the ink
- Large can with 20% more product than most competitors

### Recommendations for use:

Apply a sufficient amount of Anti-Dry to the inking rollers and the ink fountain, to ensure the ink stays open and does not form skin.
